

“Outbreaks and national emergencies often create pressure to suspend rights, standards and/or normal rules of ethical conduct. Often our decision to do so seems unwise in retrospect.”

Jonathan Kimmelman, Director of McGill University’s Biomedical Ethics unit

Dear Business Owner:

Government officials, and agencies such as the Toronto Board of Trade and the Ontario Science Table, are now pressuring you to demand proof of COVID-19 vaccination from your staff and your customers. As a group with access to a consumer network of thousands, we ask you to reject vaccine passports that jeopardize human rights, medical privacy and have no proven benefit to prevent the spread of COVID-19.

Those pressuring the private sector to coerce vaccination compliance are relying on business owners to be their enforcers. As a result, you will carry [all liability](#) including [human rights complaints](#) and potentially [compensating](#) for vaccine [injury](#) of your employees.

Targeting only the unvaccinated is unreasonable. Highly vaccinated populations, such as [Israel](#) and [the UK](#) now see noteworthy [limitations of vaccine efficacy](#) and duration of protection, inevitable with a mutating virus. Current messaging telling us it is the unvaccinated that [pose the biggest threat](#), and that the fully vaccinated are not dying or getting serious illness is inaccurate. Vaccine passports are [failing around the world](#) as data indicates that removing the rights and privileges of the unvaccinated [does not protect](#) against the spread of COVID-19. [Many businesses](#) are now resisting vaccine passport implementation. [Communist China](#) has even pulled back on their use and stress that vaccination should be informed, consented and voluntary.

There are numerous safe, practical and reliable measures [to protect the vulnerable](#) against COVID-19 — a novel vaccine that has not been proven to stop serious [infection or transmission](#) is not one of them.

We stand on the threshold of a dark chapter in Canadian history. Intrusion into individuals’ private affairs is unethical and inconsistent with the principles of a free society. Do not be the

WE STAND TOGETHER OR WE FALL APART.

henchmen of government officials and advisory boards who have failed us miserably to date. Please say no to medical apartheid and embarking upon a slippery slope towards further government surveillance and control.

Canadian values and our children's future freedoms depend on it.

Truly,
Take Action Canada

Of note:

Never forget that it was untested and [anemically supported](#) government virus suppression strategies, not COVID-19 (a virus [harmless to the vast majority](#), with a [99.94% survival rate](#)), that wreaked havoc upon your business, [our children](#) and our communities. Officials ignored the pleas of tens of [thousands of doctors](#), including top [Canadian health leaders](#), to stop futile, [destructive lockdowns](#). Rather, they followed [exaggerated](#) medical models that overlooked [actual statistics](#), numerous quality [studies](#), and data from areas that showed lockdowns [were not effective](#). Credentialed [experts who challenge](#) the government narrative continue to be censored. Researchers who confirmed that we already have safe, cheap and [effective therapeutics](#) to successfully [treat](#) COVID-19 were cast aside, as was evidence of enduring [natural immunity](#) and [T-cell immunity](#) of those who have recovered from COVID-19. While your business struggles, [unethical](#) vaccine manufacturers that have [no liability](#) for the growing [injuries caused](#) as a result of their products, make unspeakable [profits](#) using our [tax dollars](#) to get there.

This stops when we all say NO!
